The following table presents the results of the regression analysis. The dependent variable is the percentage of the population aged 15 and over who are employed in the manufacturing sector. The independent variables are the variables used in the regression analysis. The results are presented in the following table.

Mensagens importantes

Published Online First on November 11, 2009; DOI: 10.1159/000233111

Received: March 11, 2013; Accepted: April 11, 2013; Published: April 11, 2013

$\mathcal{H}_1 = \{ \mu_{\mathcal{H}_1} : \mathcal{H}_1 \subseteq \mathcal{H} \}$ and $\mathcal{H}_2 = \{ \mu_{\mathcal{H}_2} : \mathcal{H}_2 \subseteq \mathcal{H} \}$. We say that $\mathcal{H}_1$ is *more selective* than $\mathcal{H}_2$ if $\mathcal{H}_1 \subseteq \mathcal{H}_2$. If $\mathcal{H}_1$ is more selective than $\mathcal{H}_2$, then $\mathcal{H}_1$ is more selective than $\mathcal{H}$.

Resumo da sua conta

Scenario description	Mean	SD	CV (%)	Mean	SD	CV (%)	Mean	SD	CV (%)	Mean	SD	CV (%)
Scenario 1: 100% of the population is healthy	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00
Scenario 2: 10% of the population is healthy	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00
Scenario 3: 10% of the population is healthy, 10% is infected, 10% is recovered, 10% is deceased	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00
Scenario 4: 10% of the population is healthy, 10% is infected, 10% is recovered, 10% is deceased, 10% is in quarantine	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00
Scenario 5: 10% of the population is healthy, 10% is infected, 10% is recovered, 10% is deceased, 10% is in quarantine, 10% is in isolation	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00
Scenario 6: 10% of the population is healthy, 10% is infected, 10% is recovered, 10% is deceased, 10% is in quarantine, 10% is in isolation, 10% is in hospital	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00
Scenario 7: 10% of the population is healthy, 10% is infected, 10% is recovered, 10% is deceased, 10% is in quarantine, 10% is in isolation, 10% is in hospital, 10% is in intensive care	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00
Scenario 8: 10% of the population is healthy, 10% is infected, 10% is recovered, 10% is deceased, 10% is in quarantine, 10% is in isolation, 10% is in hospital, 10% is in intensive care, 10% is in critical care	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00
Scenario 9: 10% of the population is healthy, 10% is infected, 10% is recovered, 10% is deceased, 10% is in quarantine, 10% is in isolation, 10% is in hospital, 10% is in intensive care, 10% is in critical care, 10% is in death	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00
Scenario 10: 10% of the population is healthy, 10% is infected, 10% is recovered, 10% is deceased, 10% is in quarantine, 10% is in isolation, 10% is in hospital, 10% is in intensive care, 10% is in critical care, 10% is in death, 10% is in recovery	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00	1.00	0.00	0.00
